

Senior Living Project Brief

Fill the available details. Leave unresolved specifications as TBC.

Project / company

Country, state / province

Contact name

Email

Facility type / project phase

Quantity by mirror type

Size(s), units and orientation

Mirror family / proposed model

Lighting and control preferences

Frame / finish reference

Wall construction, existing conditions and service access

Documents needed / drawing reference / destination requirements

Target delivery phases / questions for review

Technical Review Checklist

Use one model reference and drawing revision throughout the submittal package.

01 / PRODUCT IDENTITY

- ☐ Proposed model / configuration and drawing revision.
- ☐ Overall size, reflecting area, depth, weight and orientation.
- ☐ Materials, frame finish and an agreed physical reference.

02 / ROOM & INSTALLATION

- ☐ Reflecting-surface elevation and relevant seated / standing views.
- ☐ Basin, faucet, accessories, wall support and fixing arrangement.
- ☐ Cable exit, supply connection and removal / service clearance.

03 / LIGHT & ELECTRICAL

- ☐ Light distribution, CCT, CRI and available tested light data.
- ☐ Switching / dimming compatibility and power-restoration behavior.
- ☐ Model-specific ratings and applicable documentation.

04 / SAMPLE, PACKING & DELIVERY

- ☐ Record sample ID, approval owner and unresolved items.
- ☐ Agree protection, accessory separation, labels and carton schedule.
- ☐ Confirm quantities, receiving windows, spares and handover files.

Save the completed PDF and attach it to your inquiry at www.ojmirror.com/contact.

This PDF does not transmit information. Model data, approvals and supply terms require review.

For applicable U.S. mirror-height provisions: www.access-board.gov/ada/chapter/ch06/

Canadian and local requirements must be established by the project designer.
